

## Chairperson's Report

2009/10 was another positive year of growth for INAP Training Development Provider. With the need for more space, INAP moved to new offices situated at Medindie in June 2009.

INAP is continually sourcing new Vet Courses to address the market demands. INAP was able to increase the range of courses on offer to students from both member and non member schools.

In part, the addition of these new courses helped increase the student participation to 627 students for 2009/2010, an exceptional achievement.

This success was due to the hard work and dedication of the INAP team. From the preparation of inductions, through course and student management, liaising with Vet coordinators and RTO'S, all of this culminating in a graduation night where students receive acknowledgement for their achievements. Combine this with strong leadership and insightful recommendations from the Executive Committee. All of these elements helped steer INAP in a positive direction.

This growth trend is continuing, confirming INAP is looking forward to a very bright, financial and sustainable future.
